

## Everything about the Parkinson's Project encourages security and vitality, comfort and companionship.

- Small by design, the residence fosters a home-like atmosphere.
- 24 studio apartments with private baths are situated in clusters with a common sitting/living area and activity kitchen.
- Four cottages allow space for a spouse or partner to live together.
- Short, wide corridors with hand-rails and no-skid surfaces make it safe and easy to move around the property – inside and out.
- A therapy pool invites residents to increase fluidity of movement with stretching and exercise.
- Lush landscape invites residents outside to enjoy a walking path, view decks, vegetable and flower gardens, a croquet lawn and more.
- Green grass is the perfect place to walk the dog. Cats and other small animals are also welcome.
- Residents are encouraged to participate in growing fresh produce and preparing meals to enjoy with friends and family.
- Advanced technology will be used to manage daily care plans as well as offer entertainment opportunities to residents.
